## HOW TO DETERMINE YOUR SUITABLE RING SIZE

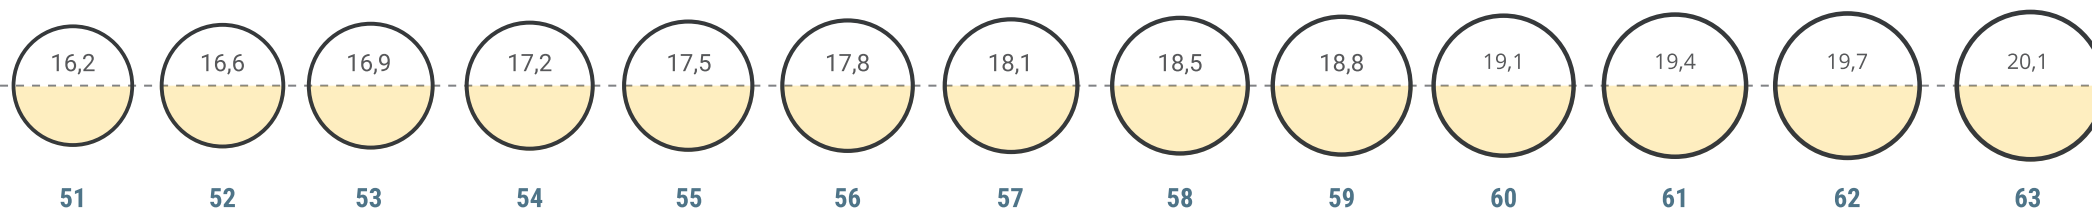

### 1 METHOD 1

Place the existing ring on the circles and compare.  
The outline must be visible inside the ring.

### 2 METHOD 2

Fold the paper at the dotted line. Cut a half circle along the circle line. This will create a round cutout that you can use to easily measuring your ring size.  
Please note that we can not guarantee if the ordered ring does not fit.

## TEMPLATE TO DETERMINE YOUR SUITABLE RING SIZE

### CONTROL STRIP

To figure out your ring size, please print this page. Printing this page in original size it's quite important that you select Landscape Mode and No Print Adjustment in your printer's page settings. Take a ruler to check the length of the control strip.  
If it's 10 cm long, the page has been printed in original size.
